

## **PRODUCT DATA SHEET**

### **POWDER NBR NPX-2235**

#### **PRODUCT DESCRIPTION:**

- NPX-2235** is processed through special technics after butadiene and acrylonitrile are copolymerized under low temperature.
- NPX-2235** is powder form macromolecule rubber.
- NPX-2235** is environmental friendly material. It has passed various measures for SGS Test and does not contain 16P.

#### **PRODUCT CHARACTERISTICS:**

- A. Controls plasticizer from precipitation** – can absorb low molecular plasticizers after addition, thereby to reduce or avoid low molecular plasticizers from precipitation
- B. Environmental friendly** — will not cause environmental pollution
- C. Not harmful to human body** – NPX-2235 is suitable to use in food and human body contact PVC products industries.

#### **PROPERTIES OF APPLICATIONS:**

**NPX-2235** can provide the following properties to PVC products:

- Heat and low temperature resistance properties
- Oil resistance property
- Increases elongation at break
- Improves compressive deformation properties
- Improves product's rebound resilience
- Low temperature flexibility

#### **APPLICATIONS:**

**NPX-2235** can be used in thermoplastic elastomer materials to fully or partially replace of liquid plasticizer.

|                                                                |                                                     |
|----------------------------------------------------------------|-----------------------------------------------------|
| • PVC Cables and Wires                                         | • Friction materials etc.                           |
| • Auto-mobile & construction use sealant, refrigerator sealant | • Plumbing pipe gasket seal                         |
| • Auto-mobile fuel pipe, hosepipe                              | • Auto mobile dust cover, Mine-use protective cover |
| • Rubber Conveyer belt, V-belt                                 | • Thin film, leatheroid, banner                     |
| • Shoe products (Galoshes and Safety boots)                    |                                                     |
